## EE 206: Homework \#9

Passive Circuit Elements, Series and Parallel with Phasors, Voltage Nodes. Due Monday, November 9th Please make the subject "EE 206 HW\#9" if submitting homework electronically to lauren.n.singelmann@ ndsu.edu (or on blackboard)

1) Determine the impedance of a resistor, inductor, and capacitor at 10,1000 , and $10 \mathrm{k} \mathrm{rad} / \mathrm{sec}$

|  | $\mathrm{R}=100 \mathrm{Ohms}$ | $\mathrm{L}=10 \mathrm{mH}$ | $\mathrm{C}=10 \mathrm{uF}$ |
| :---: | :---: | :---: | :---: |
| $10 \mathrm{rad} / \mathrm{sec}$ |  |  |  |
| $100 \mathrm{rad} / \mathrm{sec}$ |  |  |  |
| $1000 \mathrm{rad} / \mathrm{sec}$ |  |  |  |

2) Find the impedance Zab for the following circuit at $200 \mathrm{rad} / \mathrm{sec}$
3) Find the impedance Zab for the following circuit at $300 \mathrm{rad} / \mathrm{sec}$

Problem 2 \& 3

Problem 4: Assume $V_{i n}=10 \cos (200 t)$

- Write the voltage node equations for the following circuit.
- Solve for V1, V2, and V3

Problem 5) Simulate the circuit of problem \#4 in CircuitLab (or similar program) and compare the simulation results to your results from problem \#4.

Problem 6: Assume

$$
V_{i n}=10 \cos (200 t)
$$

- Write the voltage node equations for the following circuit.
- Solve for V1, V2, and V3

Problem 7) Simulate the circuit of problem \#6 in CircuitLab (or similar program) and compare the simulation results to your results from problem \#6.

Problem, 6 \& 7
