## ECE 376 - Homework \#5

Keypads in C, Stepper Motors, NeoPixels in C. Due Monday, September 26th

## NeoPixel Flashlight

1) Requirements: Specify the inputs / outputs / how they relate.

- Input a number from $0 . .255$ using the keypad
- Press RB0
- The NeoPixel then lights up with a white light at that brightness level (0..255)

2) $C$ code, flow chart, and resulting number of lines of assembler

Code: Main Loop

```
RED = 0;
GREEN = 0;
BLUE = 0;
while(1) {
            :
            C Code
            :
            }
}
```

3) Validation: Collect data in lab to verify you met the requirements.

Requirement: Input a number from 000 to 255 using the keypad

- Input 000 (works)
- Input 255 (works)
- Input 123 (works)

Requirement: Press \#. The NeoPixel goes to that brightness (255 = 100\%)

| Input Number | NeoPixels | Current (mA) | \% Full Scale <br> theory | \% Full Scale <br> measured |
| :---: | :---: | :---: | :---: | :---: |

4) Demo. Video or in person.

## Stepper Motor Angle Control

5) Requirements: Specify the inputs / outputs / how they relate.

Input:

- Keypad with numbers 000 to 999

Output:

- Stepper Motor

## Relationship

- Input a number from 000 to 999 using the keypad
- Press \#
- The stepper motor then moves to that number of steps
- At a rate of $20 \mathrm{~ms} / \mathrm{step},+/-5 \mathrm{~ms}$

6) C code, flow chart, and resulting number of lines of assembler

7) Validation: Collect data in lab to verify you met the requirements.

Requirement: Input numbers 000 to 999 with the keypar

- Input 000 (works)
- Input 999 (works)
- Input 456 (works)

Requirement: Press \# and the motor goes to that angle

| Input | Went To.. |
| :---: | :---: |
| 0 | 0 |
| 50 | 50 steps (90 degrees) |
| 100 | 100 steps (180 degrees) |
| 200 | 200 steps (360 degrees) |

Requirement: At a rate of $20 \mathrm{~ms} / \mathrm{step},+/-5 \mathrm{~ms}$

- 500 steps took 9.3 seconds (using stopwatch)
- Time $=18.6 \mathrm{~ms} /$ step

8) Demo. Video or in person.
