## ECE 376 - Test \#2: Name

## C-Programming on a PIC Processor

Open book, open notes. Calculators and Matlab permitted. Individual effort (help from other people or web sites where other people help you solve the problems not permitted).

## 1) C Coding \& Flow Charts ( 25 points)

Write a C program to control a window for a green house. Assume

- Three buttons are connected to RB2:RB1:RB0
- A temperature sensor is connected to RA0, and
- A motor is connected to $\mathrm{RC} 1: \mathrm{RC} 0$
- RC1:RC0 $=1: 0=$ open
- RC1:RC0 $=0: 1=$ close

```
void main(void) {
    unsigned char Mode;
    unsigned int A2D;
    Init_A2D(); // A=analog, B/C/D = binary
    TRISB = 0xFF;
    TRISC = 0;
    Mode = 0;
    while(1) {
        if(RBO) Mode = 0;
        if(RB1) Mode = 1;
        if(RB2) Mode = 2;
        if(Mode == 0) PORTC = 1;
        if(Mode == 1) PORTC = 2;
        if(Mode == 2) {
        A2D = A2D_Read(0);
        if(A2D > 500) PORTC = 2;
        if(A2D < 400) PORTC = 1;
        }
    Wait_ms(100);
    }
    }
```

## 2) Subroutines: ( $\mathbf{2 5}$ points)

Assume the relationship between the $\mathrm{A} / \mathrm{D}$ reading and the actual temperature is as follows. Write a C subroutine which is

- Passes the raw A/D reading (0..1023),
- Returns the temperature in degrees C , and
- Takes into account the bend in the curve when the A/D reading is 400

```
float Problem2(unsigned int A2D) {
    unsigned char Temp;
    if(A2D < 400)
        Temp = 29 - 0.0125*A2D;
    else
        Temp = 0.04*(1000 - A2D);
    return(Temp);
    }
```

## 3) Analog Inputs (25 points)

Assume the A/D input to a PIC processor has the following hardware connection where R is a 3 k thermistor where T is the temperature in degrees C

$$
R=5000 \cdot \exp \left(\frac{3200}{T+273}-\frac{3200}{298}\right) \Omega
$$

Let T be your birth date (1..31) in degrees C

At this temperature, determine

- The resistance, R,
- The voltage, V0,
- The A/D reading, and

- The smallest change in termperature you can detect

| T (degees C) <br> birth date (1..31) | R <br> Ohms | V0 <br> Volts | A/D Reading <br> $0 . .1023$ | Smallest change in T you <br> can detect |
| :---: | :---: | :---: | :---: | :---: |
| 15 | 7259.37 | $\mathbf{3 . 2 2 3 7 V}$ | 659 | $\mathbf{0 . 1 1 0 6 C}$ |

at 15 C

$$
\begin{aligned}
& R=7259.3768 \Omega \\
& V_{0}=\left(\frac{R}{R+4000}\right) 5 V=3.2237 V \\
& A 2 D=\left(\frac{3.2237 V}{5.000 V}\right) 1023=659.56
\end{aligned}
$$

round up or round down (result wil be an integer)
If the $\mathrm{A} / \mathrm{D}$ changes by one (smallest change you can see with using integers), V 0 changes by 4.88 mV

$$
\begin{aligned}
& d V=\left(\frac{1}{1023}\right) 5 V=0.004888 V \\
& V_{0}+d V=3.228590 V \\
& R=\left(\frac{V_{0}}{5-V_{0}}\right) 4000 \Omega=7290.4431 \Omega \\
& T=14.889355^{0} \mathrm{C} \\
& d T=-0.1106^{0} \mathrm{C}
\end{aligned}
$$

## 4) chi-squared test (10 points)

It's conjectured that numbers, such as stock prices, have a logarithmic distribution (it's more likely that a stock price is in the range of $10 . .19$ than $90 . .99$ ). To test this, the frequency of the first digit of 100 random stocks were recorded. Determine using a chi-square test if the data fits a log distribution.

| 1st Digit of Stock <br> Price | p <br> log distribution | np <br> expected results: log pdf | N <br> actual results | Chi-Squared |
| :---: | :---: | :---: | :---: | :---: |
| 1 | 0.3155 | 31.55 | 27 | $\mathbf{0 . 6 5 6 2}$ |
| $2-3$ | 0.3155 | 31.55 | 45 | $\mathbf{5 . 7 3 3 8}$ |
| $4-5$ | 0.1845 | 18.45 | 12 | $\mathbf{2 . 2 5 4 9}$ |
| $6-7$ | 0.1309 | 13.09 | 10.16 | 15 |
| $8-9$ | 0.1016 |  | 1 | $\mathbf{0 . 2 7 8 7}$ |

Use a chi-squared table with 4 degrees of freedom. 17.28 corresponds to a probability of slightly less than $99.9 \%$. Call it 99.8\%.

Based upon this data, there is a $\mathbf{9 9 . 8 \%}$ chance that numbers are not distributed logarithmically.

## Chi-Squared Table <br> Probability of rejecting the null hypothesis

| dof | $99.9 \%$ | $99 \%$ | $95 \%$ | $90 \%$ | $80 \%$ | $60 \%$ | $40 \%$ | $20 \%$ | $10 \%$ | $5 \%$ | $1 \%$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 10.81 | 6.64 | 3.84 | 2.71 | 1.65 | 0.71 | 0.28 | 0.06 | 0.02 | 0 | 0 |
| 2 | 13.81 | 9.21 | 5.99 | 4.61 | 3.22 | 1.83 | 1.02 | 0.45 | 0.21 | 0.05 | 0.01 |
| 3 | 16.25 | 11.35 | 7.82 | 6.25 | 4.64 | 2.95 | 1.87 | 1.01 | 0.58 | 0.22 | 0.07 |
| 4 | $\mathbf{1 8 . 4 6}$ | 13.28 | 9.49 | 7.78 | 5.99 | 4.05 | 2.75 | 1.65 | 1.06 | 0.48 | 0.21 |
| 5 | 20.50 | 15.09 | 11.07 | 9.24 | 7.29 | 5.13 | 3.66 | 2.34 | 1.61 | 0.83 | 0.41 |
| 6 | 22.43 | 16.81 | 12.59 | 10.64 | 8.55 | 6.21 | 4.57 | 3.07 | 2.20 | 1.63 | 0.87 |
| 7 | 24.31 | 18.47 | 14.06 | 12.02 | 9.80 | 7.28 | 5.49 | 3.82 | 2.83 | 2.17 | 1.24 |

## 5) t-Tests (15 points)

The value of five 100 nF capacitors were recorded:

- Data $=\{104.0 \mathrm{nF}, 94.19 \mathrm{nF}, 104.1 \mathrm{nF}, 104.7 \mathrm{nF}, 105.2 \mathrm{nF}\}$
- mean $=102.439 \mathrm{nF}$
- st dev $=4.6362 \mathrm{nF}$
a) Use a student-t test to determine the probability that a random 100 nF capacitor has a value less than 90nF

Compute the t -score

$$
t=\left(\frac{102.439 n F-90 n F}{4.6362 n F}\right)=2.6830
$$

From a t-table with 4 dof, this corresponds to a probability of about $2.5 \%$

## There is about a $\mathbf{2 . 5 \%}$ chance that a random capacitor will be less than 90 nF

b) Use a student t-test to determine the $99 \%$ confidence interval for the value of a random capacitor.

Use the $t$-table with 4 dof to find $0.5 \%$ tails

$$
t=4.60
$$

The $99.9 \%$ confidence interval is then

$$
\begin{aligned}
& \bar{x}-4.60 s<C<\bar{x}+4.60 C \\
& 81.11 n F<C<123.76 n F
\end{aligned}
$$

| Student t-Table <br> area of tail |  |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| dof $\backslash \mathrm{p}$ | 0.25 | 0.20 | 0.15 | 0.10 | 0.05 | 0.025 | 0.01 | 0.005 | 0.001 | 0.0005 |  |  |
| 1 | 1 | 1.38 | 1.96 | 3.08 | 6.31 | 12.71 | 31.82 | 63.66 | 318.31 | 636.62 |  |  |
| 2 | 0.82 | 1.06 | 1.39 | 1.89 | 2.92 | 4.3 | 6.97 | 9.93 | 22.33 | 31.6 |  |  |
| 3 | 0.77 | 0.98 | 1.25 | 1.64 | 2.35 | 3.18 | 4.54 | 5.84 | 10.22 | 12.92 |  |  |
| 4 | 0.74 | 0.94 | 1.19 | 1.53 | 2.13 | 2.78 | 3.75 | 4.6 | 7.17 | 8.61 |  |  |
| 5 | 0.73 | 0.92 | 1.16 | 1.48 | 2.02 | 2.57 | 3.37 | 4.03 | 5.89 | 6.87 |  |  |
| 6 | 0.72 | 0.91 | 1.13 | 1.44 | 1.94 | 2.45 | 3.14 | 3.71 | 5.21 | 5.96 |  |  |
| 7 | 0.71 | 0.90 | 1.12 | 1.41 | 1.89 | 2.36 | 3.00 | 3.50 | 4.78 | 5.41 |  |  |
| infinity | 0.674 | 0.842 | 1.036 | 1.282 | 1.645 | 1.960 | 2.326 | 2.576 | 3.090 | 3.29 |  |  |
