# ECE 376 - Test \#2: Name 

## C-Programming on a PIC Processor

Open book, open notes. Calculators and Matlab permitted.
Individual effort (giving or receivinghelp from others of from Chegg not allowed).

## 1) C Coding (25 points)

A thermistor is connected to the analog input (RA0) so that the voltage goes up as temperature goes up. Write a C program that turns on lights based upon voltage:

- $\mathrm{A} / \mathrm{D}>4.5 \mathrm{~V}$ Red LED blinks on for 500 ms , then off for 500 ms (RC1)
- $4 \mathrm{~V}<\mathrm{A} / \mathrm{D}<4.5 \mathrm{~V}$ Red LED turns on $(\mathrm{RC} 2=1)$
- $3 \mathrm{~V}<\mathrm{A} / \mathrm{D}<4 \mathrm{~V}$ Yellow LED turns on $(\mathrm{RC} 1=1)$
- A2D $<3 \mathrm{~V}$ : $\quad$ Green LED turns on $(\mathrm{RC} 0=1)$

Assume the $\mathrm{A} / \mathrm{D}$ is initialized and subrouting A2D_Read(x) is avilable.

```
void main(void)
    unsigned int mV;
    unsigned int A2D;
    ADCON1 = 0x0F
    A2D_Init();
    TRISB = 0xFF;
    TRISC = 0;
    while(1) {
        A2D = A2D_Read(0);
        mV = A2D * 4.88;
        if(mV > 450) {
            RCO = 0;
            RC1 = 0;
            RC2 = !RC2;
            }
        elseif(mV > 400)
            PORTC = 4;
        elseif(mV > 300)
            PORTC = 2;
        else
            PORTC = 1;
        Wait_ms(500);
        }
    }
```

## 2) Morse Code: Bottom Up Programming (25 points)

a) Write a subroutines $\operatorname{Dash}()$ and $\operatorname{Dot}()$ which output a single dash and dot for Morse code when called:

- Dash(): RC0 goes high for 300 ms the low for 100 ms
- $\operatorname{Dot}():$ RC0 goes hight for 100 ms then low for 100 ms

```
void Dash(void) {
    RCO = 1;
    Wait_ms(300);
    RCO = 0;
    Wait_ms(100);
    }
void Dot(void) {
    RCO = 1;
    Wait_ms(100);
    RCO = 0;
    Wait_ms(100);
    }
```

b) Write a subroutine which outputs Morse code for numbers $\{0,1,2\}$ when numbers $\{0,1,2\}$ are passed to it:

## 3) Analog Inputs (25 points)

A light sensor has a resistance vs. lux relationship of

$$
R_{1}=\left(\frac{10,000}{(L u x)^{0.6}}\right) \Omega
$$

Determine the following assuming

- The A/D reading is 513, and
- $\mathrm{R} 2=800+100$ (your birth month) + (your birth date)

| R2 <br> $800+100^{*} \mathrm{~m}+$ day | V1 | A/D Reading | R1 | Lux |
| :---: | :---: | :---: | :---: | :---: |
| 1,314 | $\mathbf{2 . 5 0 7 3 V}$ | 513 | $\mathbf{1 3 2 1 . 7}$ | $\mathbf{2 9 . 1 5 8}$ |

$$
\begin{aligned}
& V_{1}=\left(\frac{513}{1023}\right) 5 V=2.5073 V \\
& V_{1}=\left(\frac{R_{1}}{R_{1}+R_{2}}\right) 5 V \\
& R_{1}=\left(\frac{V_{1}}{5-V_{1}}\right) 1314 \Omega=1321.729 \Omega \\
& R_{1}=1321.729 \Omega=\left(\frac{10,000}{(L u x)^{0.6}}\right) \Omega \\
& L u x=29.158
\end{aligned}
$$

## 4) chi-squared test (10 points)

Hector has been recording temperatures in Fargo since 1942 ( 81 years). For the past 27 years, 16 years where in the hottest $33 \%$, six in the middle $33 \%$, and five in the coldest $33 \%$.
Use a chi-squared test to determine if the weather in Fargo is changing (probability of rejecting the null hypothesis: each interval is equally likely)

| \# Wins <br> wins after 16 games | p <br> binomial distribution | np <br> expected results | N <br> actual results | Chi-Squared |
| :---: | :---: | :---: | :---: | :---: |
| Hottest $33 \%$ | $1 / 3$ | 9 | 16 | 5.44 |
| Middle $33 \%$ | $1 / 3$ | 9 | 6 | 1 |
| Coldest $33 \%$ | $1 / 3$ | 9 | 5 | 1.78 |
|  |  |  |  |  |

$$
\chi^{2}=\left(\frac{(n p-N)^{2}}{n p}\right)
$$

Sample size $=3$, meaning 2 degrees of freedom
A chi-squared score of 8.22 corresponds to a probability of about $98 \%$

I can reject the null hypothesis with a confidence level of $\mathbf{9 8 \%}$
There is a $\mathbf{9 8 \%}$ chance that the yearly average temperature in Fargo is changing.

| Chi-Squared Table <br> Probability of rejecting the null hypothesis |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| dof | 99\% | 95\% | 90\% | 80\% | 60\% | 40\% | 20\% | 10\% | 5\% | 1\% |
| 1 | 6.64 | 3.84 | 2.71 | 1.65 | 0.71 | 0.28 | 0.06 | 0.02 | 0 | 0 |
| 2 | 9.21 | 5.99 | 4.61 | 3.22 | 1.83 | 1.02 | 0.45 | 0.21 | 0.05 | 0.01 |
| 3 | 11.35 | 7.82 | 6.25 | 4.64 | 2.95 | 1.87 | 1.01 | 0.58 | 0.22 | 0.07 |
| 4 | 13.28 | 9.49 | 7.78 | 5.99 | 4.05 | 2.75 | 1.65 | 1.06 | 0.48 | 0.21 |
| 5 | 15.09 | 11.07 | 9.24 | 7.29 | 5.13 | 3.66 | 2.34 | 1.61 | 0.83 | 0.41 |
| 6 | 16.81 | 12.59 | 10.64 | 8.55 | 6.21 | 4.57 | 3.07 | 2.20 | 1.63 | 0.87 |
| 7 | 18.47 | 14.06 | 12.02 | 9.80 | 7.28 | 5.49 | 3.82 | 2.83 | 2.17 | 1.24 |

## 5) t-Tests (15 points)

Hector airport has been monitoring the weather in Fargo since 1942.

| Population | mean | standard deviation | sample size |
| :---: | :---: | :---: | :---: |
| A: $1996-2022$ | 42.7559 F | 2.1936 F | 27 |
| B: $1942-1968$ | 40.5330 F | 1.7303 F | 27 |

Use a student t -test to determine the probability that population A has a higher mean than population B .

- What is the probablity that Fargo is getting warmer?
- Note: population question. What is the chance that Fargo is getting warmer?

Create a new variable, $\mathrm{W}=\mathrm{A}-\mathrm{B}$

$$
\begin{aligned}
& \bar{x}_{w}=\bar{x}_{a}-\bar{x}_{b}=2.2229 \\
& s_{w}=\sqrt{\frac{s_{a}^{2}}{27}+\frac{s_{b}^{2}}{27}}=0.5377
\end{aligned}
$$

Find the t -score

$$
t=\left(\frac{\bar{x}_{w}}{s_{w}}\right)=4.1342
$$

Convert this to a probability using a t -table with 26 degrees of freedom

$$
\mathrm{p}=0.99984
$$

From the data, it is $\mathbf{9 9 . 9 8 4 \%}$ certain that the weather in Fargo has changed since 1942

| Student t-Table <br> area of tail <br> dof $\backslash \mathrm{p}$ |  |  |  |  |  |  |  |  |  |  |  |  |  | 0.25 | 0.20 | 0.15 | 0.10 | 0.05 | 0.025 | 0.01 | 0.005 | 0.001 | 0.0005 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 1 | 1.38 | 1.96 | 3.08 | 6.31 | 12.71 | 31.82 | 63.66 | 318.31 | 636.62 |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 2 | 0.82 | 1.06 | 1.39 | 1.89 | 2.92 | 4.3 | 6.97 | 9.93 | 22.33 | 31.6 |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 3 | 0.77 | 0.98 | 1.25 | 1.64 | 2.35 | 3.18 | 4.54 | 5.84 | 10.22 | 12.92 |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 4 | 0.74 | 0.94 | 1.19 | 1.53 | 2.13 | 2.78 | 3.75 | 4.6 | 7.17 | 8.61 |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 5 | 0.73 | 0.92 | 1.16 | 1.48 | 2.02 | 2.57 | 3.37 | 4.03 | 5.89 | 6.87 |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 6 | 0.72 | 0.91 | 1.13 | 1.44 | 1.94 | 2.45 | 3.14 | 3.71 | 5.21 | 5.96 |  |  |  |  |  |  |  |  |  |  |  |  |  |
| 7 | 0.71 | 0.90 | 1.12 | 1.41 | 1.89 | 2.36 | 3.00 | 3.50 | 4.78 | 5.41 |  |  |  |  |  |  |  |  |  |  |  |  |  |
| infinity | 0.674 | 0.842 | 1.036 | 1.282 | 1.645 | 1.960 | 2.326 | 2.576 | 3.09 | 3.29 |  |  |  |  |  |  |  |  |  |  |  |  |  |
