1: Project Selection

ECE 403 Homework #1

Due Week 2
One homework set per group

Choose your top-three choices for your Senior Design II and III project. You can choose from a list or make up your own. This project needs to be

- Simple enough to complete in two semesters (so you can graduate),
- Complicated enough to be split into three sections (one for each student on your team), and
- Each section needs to be complicated enough that each student is able to demonstrate his/her knowledge of electrical and computer engineering

    Each student can apply four or more advanced ECE concepts to his/her part of the design

Notes:

- If you would like to have a workstation in the ECE department, you need to have a group of three (we have a limited number of senior design stations).
- If you would like to work at home or elsewhere (possibly at work), a group of one is OK.

Team Members:	
1st Choice	
2nd Choice	
3rd Choice
