

ECE 476 - Homework #1

Python Programming - Due Wednesday, September 3rd

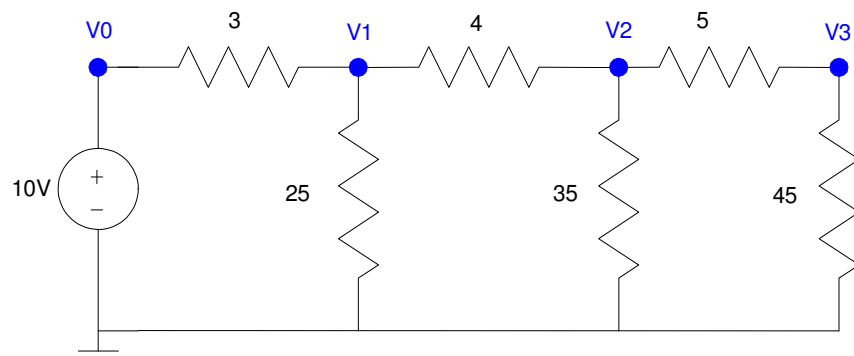

- 1) Use Thonny as a calculator (similar to the Matlab command window) to determine the resistance R_{ab}

- 2) Use Thonny as a calculator to determine the currents using current division

- 3) Use Thonny as a calculator to determine the voltages $\{V_1, V_2, V_3\}$

4) Use Thonny as a calculator to determine the impedance Z_{ab}
